**9 MOTION (HON. HON. ISAAC CHIRCHIR – MCA SOY WARD)**

**Aware that** maize planting season in Uasin-Gishu County has just come to an end, **Further aware** that most maize farmers in the County used subsidized fertilizer distributed to them by the Government through the National Cereals Board, **Noting that** the region experienced even and sufficient rainfall that ensured almost perfect germination of maize seeds, **Concerned that** the young maize plants have mysteriously turned yellow soon after germination suspicious of deficiency of organic mineral supplement ordinarily offered by the fertilizer, **Cognizant that** the yield for this season may be adversely affected in the event of which the County's Socio-economic prosperity is likely to be equally affected, **Worried that** wheat planting season is about to start and farmers are most likely going to use similar subsidized fertilizer a situation that may result in similar consequences; This County Assembly urges the County Government, either by itself or in collaboration with other relevant National Government agencies to carry out soil and fertilizer sampling and analysis with the view to urgently identifying the cause of the yellow phenomenon in the maize plants and submit to this County Assembly a report on the outcome thereof as well as necessary interventions to be taken to safeguard or caution farmers from probable loss or further damage.
