5. Papers
6. Notices of Motion
7. Statements

**8. MOTION (HON. ROSEBELLA SINGOEI – NOMINATED MCA)**

**Aware that** the latest statistics released by the Ministry of Health, life expectancy in Kenya is just 45 years, **Further Aware that** this situation has been occasioned by the development of a middle class society which is prone to poor eating habits and lack of adequate physical exercises that has resulted in obesity, diabetes, cancer, blood pressure, stroke and other related health conditions, **Concerned that** this situation will continue to deteriorate because a large proportion of the population lack access to information, awareness and in some circumstances, a general apathy and don't care attitude amongst most people towards healthy living, **Noting that** expectancy in developed countries currently stands at 60 years due to observation of recommended and proper dietary habits and adherence to good health living and lifestyles, **Cognizant that** based on the statistics released by the World Health Organization (WHO), life expectancy levels in most developing countries will continue to decrease if no steps are taken to arrest the trend of increased inappropriate living styles; This County Assembly urges the County Government of Uasin Gishu to come up with programs that will promote health awareness on dietary habits and establish testing, diagnostic and fitness centers preferably in all sub counties.
